2. The following is an Examiner's Statement of Reasons for Allowance:

2.1 Claims 5, 14, and 21-22 are allowable because the combination of the means/step for
estimating the output torque by one of two alternative methods as respectively recited in the
claims, depending on whether the ratio between the input and output speeds of the torque

converter is greater than a predetermined value, with the other limitations of the respective claims is deemed to have not been taught by the cited prior art.

2.2 Claims 6-7 are allowable because the combination of a neural network, which receives throttle opening and vehicle acceleration values to estimate weight of a vehicle for selecting a gear position of the automatic transmission, with the other limitations of the claims is deemed to have not been taught by the cited prior art.

2.3 Claim 13 is allowable because the combination of means for estimating the vehicle weight based on the throttle valve opening and vehicle speed in addition to the acceleration of the vehicle with the other limitations of the claim is deemed to have not been taught by the cited prior art.

2.4 Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
